Research Interests

I'm interested in studying galaxy evolution with a background in $z \sim 0.4$ to ~ 9 emission line galaxies traced via narrowband surveys, spectroscopic follow-ups, and broadband nebular color excess surveys. Recently, I've been very much interested in extreme emission line galaxies at various cosmic epochs to understand what physical processes/mechanisms are driving high EWs and what it means in terms of star-formation activity, ionizing photon budget, and implications for Reionization. This also convolves with my interest in studying key statistical and physical properties of star-forming galaxies (LFs, SMFs, EWs), environmental dependencies on star-formation and galaxy, investigations of changing ISM conditions via spectroscopy, and investigating star-formation histories using latest SED fitting suites and spectra. I also am interested in creating large spectroscopic surveys using archived data and developing tools to visualize them.

Publication Record (October 2023)

Number of Publications (first author): **31 (7)**.
Total citations (first author): **2699 (219)**.
h-index: **18**. i10-index: **21**. g-index: **30**. m-index: **1.3**

Current Position

Postdoctoral Research Associate — Sept 2021 – present
Rochester Institute of Technology
Supervisor: Prof. Jeyhan Kartaltepe

Past Positions

Visiting Researcher — Oct 2021 – Dec 2022
NASA Goddard Space Flight Center

NASA Postdoctoral Program Fellow — Sept 2018 – Sept 2021
NASA Goddard Space Flight Center
Supervisors: Dr. Sangeeta Malhotra & Dr. James Rhoads

Education

University of California, Riverside — 2013 – 2018
PhD, Physics
Adviser: Prof. Bahram Mobasher & Dr. David Sobral (Lancaster Univ.)
Dissertation: The Evolution of Star-Forming Galaxies using the Largest Narrowband Surveys

University of California, Riverside — 2012 – 2013
MS, Physics
Adviser: Prof. Bahram Mobasher & Dr. David Sobral (Univ. of Lisbon)

University of California, Irvine — 2008 – 2012
BS, Physics (Specialization in Astrophysics)
Honors - Cum Laude
Adviser: Prof. Asantha R. Cooray

Research Fellowships

NASA Postdoctoral Program Fellow — Sept 2018 – Sept 2021

NASA Earth & Space Sciences (now FINESST) PhD Fellow 2016 – 2018

Chancellor's Distinction Fellow 2012 – 2013

Harvard SAO/CfA REU Intern June – Aug. 2011

Undergraduate Research Opportunities Program Fellow Jan. – June 2011

Summer Undergraduate Research Program Fellow June – Sept. 2010

Awards

Anne Kernan Award for Outstanding Senior Graduate Student Researcher June 2018
Prestigious award given to senior PhD students for their research and achievements throughout their graduate school years

Outstanding Teaching Assistant Award June 2018
Awarded to students for demonstrating effective teaching skills

GSA Conference Travel Grant June – July 2016
Funding from Graduate Student Association to attend a conference

National Science Foundation Graduate Research Fellowship 2012, 2013, 2014
Honorable Mention (3 times)

Chambliss Astronomy Achievement Student Award Jan. 2012
Honorable Mention – 219th AAS Meeting

Graduate Mentorship

Santosh Harish (ASU PhD student; now RIT Postdoc) Sept. 2018 – March 2020
Project: Statistical Properties of Hα- and [OIII]-selected emission line galaxies at $z \sim 0.6$
Paper: Harish et al., 2020, ApJ, 892, 30 & Harish et al., 2022, ApJ, 934, 2

Lucia Perez (ASU PhD student; now CCA Postdoc) Sept. 2018 – Sept 2019
Project: Clustering of [OII] Emitters in the LAGER Survey

Minor RIT PhD Mentorship
Sadie Coffin, Jitrapon Lertprasertpon, Isa Cox, Brittany Vanderhoof (now STScI Postdoc)

Minor UCR PhD Mentorship
Nima Chartab (now Carnegie Postdoc), Marziye Jafariyazani (now IPAC Postdoc)

Undergraduate Mentorship

Ash Bista (RIT Undergrad) Sept 2022 – Jun 2023
Project: CIGALE SED Fitting of a $z \sim 2.5$ dusty, massive star-forming galaxy
Paper: Vanderhoof et al., *in prep*

Mehruba Zaman (UCR Undergrad; NASA FIELDS Intern) Jan. - June 2017
Project: Learning MAGPHYS and how to extract galaxy properties

Community Outreach

RIT Galaxy Evolution Journal Club Sept 2022 – present
Purpose: Lead organizer of RIT journal club. On Benty-Fields

Gemini Fast Turnaround TAC January 2023
Purpose: Reviewed and Graded Short Fast Turnaround Proposals

RIT Science Jamboree Oct 2021 & 2023
Purpose: Judged Science Talks from Master and PhD Students

Emission Lines in Galaxies: Discovery and Diagnostics June 2021
Main Co-Organizer of 238th AAS Meeting-in-a-Meeting Session

NASA Program Reviewer 2021, 2023
Purpose: Expert reviewer in a NASA peer review

NASA Review Panel Fall 2020
Purpose: Review Proposals for Research Funding Purposes

Chambliss Astronomy Achievement Award Judege Winter 2020
Purpose: Judged Undergraduate Posters for the Associated award

Awarded Funding

Keck PI Award ($13,975) 2022 – 2024

NASA Postdoctoral Program Fellowship ($234,672) 2018 – 2021
$ 30,000 reserved for non-stipend research expenses

NASA Earth & Space Sciences Fellowship ($75,000) 2016 – 2018
$ 16,000 reserved for non-stipend research expenses

Awarded Proposals

Gemini Fast Turnaround (GS-2023A-FT-201; PI)
Title: Strong Outflows from a $z \sim 2.5$ CIV Emitter: Star-forming or AGN driven?
Nights: 2 hours Flamingos-2 Observations

Keck 2022B (PID 88/2022B_N190; PI)
Title: Confirmation of the Highest Redshift [OII] Emitters at $z \sim 5$
Nights: 2 half nights

JWST Cycle 1 #2321; CoI
Title: The first blind Hα narrow-band survey of star-formation at $z > 6$

JWST Cycle 1 #1635; CoI
Title: Galaxy Protoclusters as Drivers of Cosmic Reionization

Observing Experience

Blanco 4m Telescope – CTIO, Chile
DECam (photometry): 1.5 nights

W. H. Keck Observatory – Mauna Kea, Hawaii
DEIMOS (spectra): 8 nights
MOSFIRE (spectra): 8.5 nights

Subaru Telescope – Mauna Kea, Hawaii
FMOS (spectra): 1 night

William Herschel Telescope – La Palma, Canary Islands, Spain
ISIS (spectra): 2 nights

Technical Skills

Programming Skills: Python (main), IDL, Shell Script, C, SQL
Computer Skills: Mac OSX, Windows, Ubuntu, LaTeX, PowerPoint
Astronomical Tools: DS9, TopCat, SExtractor, IRAF/PyRAF
Photo-z Tools: EaZY, LePhare
SED & Line Fitting: Cigale, Prospector, Bagpipes, Magphys, PyQSOFit
Data Reduction Experience: Pypeit (extensive), FIBER-pac, MOSFIRE DRP
Data Experience: Extensive experience analyzing observer-frame optical and near-IR spectroscopic data. Many years experience creating clean, reliable samples of narrowband-selecting galaxies.
Machine Learning: KDTree, Clustering, Nearest Neighbors
Statistical Analyses: MCMC, Metropolis-Hastings, Bootstrapping, Bayesian Statistics, MLE

Public Outreach

Grand Opening of KID Museum – Bethesda, MD — 21 – 22 May 2022
Led an Exhibit on Robotics and Drones and how to program them
Partnered with Dept. of Electrical & Computer Engineering of Univ. of Maryland

AST Graduate Skills Seminar – Career Panelist — 1 Oct 2021
Discussion of how to succeed in the Postdoc Job Market
School of Physics & Astronomy, Rochester Institute of Technology

Virtual Science Night and Career Panel — 10 Febr 2021
Providing mini science lectures and career advice for local students
Ramona High School in Riverside, CA

What is an Astronomer? – Early Childhood Learning Center — 3 June 2019
Public talk to Preschoolers at the Irvine Unified School District in California

Public Telescope Observation – UC Riverside — 20 Febr 2018
Public event on UCR campus. Prepared/Operated Telescopes

Press Release: "Distant galaxies glow bright in oxygen" — Oct 2016
Public outreach of results in Khostovan et al. (2016)
Distributed to UCRToday, Lancaster, Astronomy Now, My Science, and other science media sources

Long Night of Arts and Innovation – Downtown Riverside — Oct 2015 & 2017
Large event hosted by City & County of Riverside
Interact with Community and answer astronomy-related questions
Setup/Operate Telescopes

Cosmic Thursday – UC Riverside — 2014 – 2016 (monthly)
Setup and Operate Telescopes and answer questions from the community

Physics of Music – UC Irvine — Spring 2013
Presented Iranian instruments and discussed the underlying physics for an undergraduate non-majors Physics course (PHYS 15)

Teaching Experience

astroTopics — 2017 – 2018; Sept 2022 – present
A get together I first started during my PhD years and restarted at RIT for Jeyhan Kartaltepe's group. The idea is to select a topic of interest (e.g., Overview of rest-frame optical nebular diagnostics) and we all do our own background search (e.g., papers, books, lectures, youtube videos). After a week, we all get together and share

what we have learned about that specific topic. It creates an environment of equals that allows undergrads, PhD students, and postdocs to collectively learn from each other. My role would also include running the weekly get togethers, start/lead the discussion, and ensure a safe environment for everyone to learn (especially students to feel safe and ask questions from senior students, postdocs, and faculty).

TA: History of the Universe (non-science majors; UCR) Spring 2015
An introduction to "The Big Bang" model and its observational tests. Topics include dark energy, dark matter, rapid growth of universe at early times, leftover radiation from "The Big Bang", galaxy formation, bending of light by gravity, black holes, extraterrestrial life, and the likely fate of the universe.

TA: The Violent Universe (non-science majors; UCR) Winter 2014 & 2015
An introduction to violent phenomena that power the universe, specifically phenomena that illustrate basic astrophysical principles. Topics include impacts in our planetary system: explosions of stars, bursts of star formation, galaxy collisions, black holes, quasars, cosmic jets, and the "Big Bang"

TA: Origins (non-science majors) Fall 2013, 2014, 2015
Explores the most fundamental questions in cosmology, physics, and chemical sciences through their origins. Topics include the origin of the Universe, origin of matter, first generation of stars and galaxies, origin of chemical elements, chemistry of life, and astrobiology.

TA: General Physics Lab (Engineering Students) Spring 2014
Covers topics in mechanics, thermodynamics, and electromagnetism. Includes fluid mechanics, temperature, and heat, the laws of thermodynamics, kinetic theory of gases, electric fields and potentials, current and DC circuits, capacitance and inductance, magnetism, and Faraday's law.

TA: General Physics (Biology Students) Winter 2013
Covers topics in mechanics, thermodynamics, and electromagnetism. Includes fluid mechanics, temperature, and heat, the laws of thermodynamics, kinetic theory of gases, electric fields and potentials, current and DC circuits, capacitance and inductance, magnetism, and Faraday's law.

TA: General Physics Lab (Biology Students) Winter 2013, Spring 2013, Summer 2015
Laboratory course that covers harmonic oscillations, mechanical and electromagnetic waves, geometrical optics, reflection, refraction, interference, diffraction, and polarization, and quantum, atomic, and nuclear physics. Course also covers classical mechanics including Newton's laws of motion, work, energy, and conservation of energy, momentum and collisions, rotational motions, and orbital motion.

Invited Talks

Astrophysical Sciences & Technology Colloquium 7 Dec 2021
Location: Rochester Institute of Technology
Title: A 13 Billion Year Old Story told by Narrowband Surveys

Emission Lines in Galaxies: Discovery and Diagnostics June 2021
Location: 238th American Astronomical Society Meeting-in-a-Meeting
Title: Intrinsic Properties of Hα Equivalent Width Distributions from $z \sim 0.4 - 2$: Implications on Episodic Star Formation Histories

SED Director's Seminar 9 Nov 2018

Location: NASA Goddard Space Flight Center
Title: Properties of Star-Forming Galaxies with the Largest Narrowband Surveys

Astrophysics Seminar 22 June 2017
Location: Lancaster University
Title: Clustering Properties of [OIII] and [OII] emitters over the past 12.5 Gyrs

Astrophysics Seminar 4 July 2016
Location: Lancaster University
Title: Exploring the Young Universe with the Largest Emission Line Surveys

Astronomy Seminar 13 Mar. 2015
Location: Univ. of Lisbon
Title: Probing the Evolution of Hβ+[OIII] and [OII] emitters up to $z \sim 5$ with HiZELS

Master's Class 12 Mar. 2015
Location: Univ. of Lisbon
Title: Probing the Evolution of Hβ+[OIII] and [OII] emitters up to $z \sim 5$ with HiZELS

Special Astronomy Seminar 24 Febr. 2015
Location: UC Irvine
Title: Probing the Evolution of Hβ+[OIII] and [OII] emitters with HiZELS

Star Formation Lunch Seminar 8 Aug 2011
Location: Center for Astrophysics, Harvard University
Title: Molecular Demographics of the Pipe Nebula: The Chemical Evolution

TALKS

Roman Science Inspired by Emerging JWST Results 20 – 23 June 2023
Location: Space Telescope Science Institute, Baltimore, Maryland
Title: Let's Go Extreme with Roman: Observing $z \sim 0.5 - 2$ low & high EW ELGs

COSMOS Team Meeting 23 – 26 May 2023
Location: Rochester Institute of Technology
Title: Past Spectra for Future Science: A Public COSMOS Spectroscopic Archive

COSMOS Team Meeting – *Virtual Talk due to COVID-19* 11 – 13 July 2022
Location: IAP, Paris, France
Title: Past Spectra for Future Science: A Public COSMOS Spectroscopic Archive

Roman Science Team Community Briefing – *Virtual Talk* 18 Nov 2021
Location: NASA Goddard Space Flight Center
Title: Measurements of Hα Equivalent Width Distributions:
The Second Tool in *Roman* Grism Survey Planning

NASA Early Career Scientist Forum – *Virtual Talk* 10 – 13 Nov 2020
Location: NASA Goddard Space Flight Center
Title: Mapping the Redshift Evolution of Hα Equivalent
Width Distributions: Implications for NGRST Grism Surveys

Galaxy Formation and Evolution in the Era of NGRST 5 – 9 Oct 2020
Location: Space Telescope Science Institute, Baltimore, Maryland
Title: Intrinsic Properties of Hα Equivalent Width Distributions

Virtual Recorded Talk

USRA Site Visit – *Virtual Talk* 20 Aug 2020
Location: NASA Goddard Space Flight Center
Title: Evolution of Star-Forming Galaxies using the Largest Narrowband Surveys

LAGER Team Workshop – *Virtual Talk* 13 – 16 July 2020
Location: Virtual Meeting
Title: Physical Correlations of Hα Equivalent Width Distributions: Real or Selection Driven?

WFIRST Science Jamboree 2 March 2020
Location: Flatiron Institute, New York City, New York
Title: Statistical Properties of $z > 0.4$ Hα, [OIII] and [OII] Emitters: Implications for WFIRST

235th American Astronomical Society Conference 4 - 8 January 2020
Location: Honolulu, Hawaii
A large, deep 3 deg^2 survey of Hα, [OIII], and [OII] emitters from LAGER: constraining luminosity functions

COSMOS 2019 14 - 17 March 2019
Location: Flatiron Institute, New York City, New York
Title: The Lyα and UV luminosity-dependent clustering of typical Lyα emitters up to $z \sim 6$

NASA Early Career Scientist Forum 1 Nov 2018
Location: NASA Goddard Space Flight Center
Title: Clustering Properties of Typical Lyα Emission Line Galaxies

231st American Astronomical Society Conference 8 - 12 January 2018
Location: Washington, DC
Title: Clustering Properties of Emission Line Selected Galaxies over the past 12.5 Gyrs

Galaxy Evolution Across Time Conference 12 - 16 June 2017
Location: Paris, France
Title: Clustering Properties of [OIII] and [OII] emitters over the past 12.5 Gyrs

National Astronomical Meeting 27 June - 1 July 2016
Location: University of Nottingham
Title: The Nature of Hβ+[OIII] and [OII] emitters to $z \sim 5$ with HiZELS: stellar mass functions and the evolution of EWs

228th American Astronomical Society Conference 12 - 16 June 2016
Location: San Diego, California
Title: The Nature of Hβ+[OIII] and [OII] emitters to $z \sim 5$ with HiZELS: stellar mass functions and the evolution of EWs

Smithsonian Astrophysical Observatory Research Symposium 10 Aug 2011
Location: Center for Astrophysics, Harvard University
Title: Molecular Demographics of the Pipe Nebula: The Chemical Evolution

Posters

Large-Volume Spectroscopic Analyses of AGN and Star-Forming Galaxies in the Era of JWST — 29 Mar – Apr 1 2022
Location: Space Telescope Science Institute, Baltimore, Maryland (*Virtual*)
Title: Building A Public Spectroscopic Archive of the COSMOS Legacy Field

NASA Sciences & Exploration Directorate Poster Party — 23 Jan 2020
Location: NASA Goddard Space Flight Center
Title: The Lyα and UV luminosity-dependent clustering of typical Lyα emitters up to $z \sim 6$

233rd American Astronomical Society Conference — 6 - 10 Jan 2019
Location: Seattle, Washington
Title: The Lyα and UV luminosity-dependent clustering of typical Lyα emitters up to $z \sim 6$

Back at the Edge of the Universe Conference — 15 - 19 Mar 2015
Location: Sintra, Portugal
Title: Evolution of the Hβ+[OIII] and [OII] Luminosity Functions and the [OII] Star-Formation History of the Universe up to $z \sim 5$

219th American Astronomical Society Conference — 8 - 12 Jan 2012
Location: Austin, Texas
Title: Herschel HerMES: Identifying Counterparts in CANDELS HST & SpUDS IRAC data

Inaugural Center for Galaxy Evolution Workshop — 1 - 2 Mar 2011
Location: University of California, Irvine
Title: Spitzer Imaging of Herschel-ATLAS Gravitationally Lensed Submillimeter Sources

217th American Astronomical Society Conference — 9 - 13 Jan 2010
Location: Seattle, Washington
Title: Spitzer Imaging of Herschel-ATLAS Gravitationally Lensed Submillimeter Sources

List of Publications (November 2023)

First-Author Refereed Publications

A. A. Khostovan, S. Malhotra, J. Rhoads, et al. (2024)
Redshift, Stellar Mass-dependent Evolution of Hα Equivalent Widths from $z \sim 0.4-2.2$: implications for star formation, *NGRST*, and *Euclid*
MNRAS, submitted

A. A. Khostovan, S. Malhotra, J. Rhoads, et al. (2021)
Correlations between Hα Equivalent Width and Galaxy Properties at $z = 0.47$: Physical or Selection-Driven?
MNRAS, 503, 5115

A. A. Khostovan, S. Malhotra, J. Rhoads, et al. (2020)
A large, deep 3 deg^2 survey of Hα, [OIII], and [OII] emitters from LAGER: constraining luminosity functions
MNRAS, 493, 3966

A. A. Khostovan, D. Sobral, B. Mobasher, et al. (2019)
The clustering of typical Lyα emitters from $z \sim 2.5-6$: host halo masses depend on Lyα and UV luminosities
MNRAS, 489, 555

A. A. Khostovan, D. Sobral, B. Mobasher, et al. (2018)
The clustering of Hβ+[OIII] and [OII] emitters since $z \sim 5$: dependencies with line luminosity and stellar mass
MNRAS, 478, 2999

A. A. Khostovan, D. Sobral, B. Mobasher, et al. (2016)
The nature of Hβ+[OIII] and [OII] emitters to $z \sim 5$ with HiZELS: stellar mass functions and the evolution of EWs
MNRAS, 463, 2363
Press Release Hyperlink

A. A. Khostovan, D. Sobral, B. Mobasher, et al. (2015)
Evolution of the Hβ+[OIII] and [OII] Luminosity Functions and the [OII] Star-Formation History of the Universe up to $z \sim 5$
MNRAS, 452, 3948

Other Refereed Publications

F. Sinigaglia, G. Rodighiero, ..., **A. A. Khostovan** et al. (submitted)
MIGHTEE-HI: HI galaxy properties in the large-scale structure environment at $z \sim 0.37$ from a stacking experiment
MNRAS, submitted

S. Rezaee, N. Reddy, ..., **A. A. Khostovan** et al. (2023)
Exploring the correlation between Hα-to-UV ratio and burstiness for typical star-forming galaxies at $z \sim 2$
MNRAS, 526, 1512

C. Casey, J. Kartaltepe, ..., **A. A. Khostovan** et al. (2023)
COSMOS-Web: An Overview of the JWST Cosmic Origins Survey
ApJ, 954, 31

S. Harish, I. Wold, S. Malhotra, ..., **A. A. Khostovan** et al. (2022)
New spectroscopic confirmations of Lyα emitters at $z \sim 7$ from the LAGER survey
ApJ, 934, 167
